1. AI Use Summary

Question	Student Response
Did you use any AI tool for this lab?	Yes
Estimated percentage of the work influenced by AI	20%
Did you attach evidence of AI use where applicable?	Yes

2. Details of AI Use

Complete the table below for each AI tool used. Add more rows where necessary.

Name of AI Tool Used	Purpose for Using the Tool	Prompt or Instruction Given to the Tool	Part(s) of the Work Influenced by the Tool	How I Verified, Edited, or Improved the AI Output
GitHub Copilot with Claude Haiku	I used it for learning support, syntax guidance, while working with NumPy, Pandas, and Seaborn.	I asked for help understanding how to perform operations as array normalization, handling missing values, grouping and aggregating data, creating visualizations, and fixing errors in my code.	Some parts of the NumPy, Pandas, and Seaborn sections, especially syntax, grouping, aggregation, visualization, and error fixes.	I reviewed the suggestions, compared them with the assignment TODOs, edited the code where needed to fit the scope of the assignment, ran the notebook, checked the outputs, and made sure I understood the final implementation.

Checking if the TODOs were completed, explain the column-wise normalisation check, help identify Seaborn plotting errors, and confirm that the final notebook ran successfully.	debugging feedback, normalization check, visualization fixes, and final check for submission.	suggestions, reran the notebook from top to bottom, confirmed that there were no errors, and verified that I understood the corrections before submitting.

3. Attachment of AI Output Evidence

Where required, attach evidence of AI use. Tick all that apply. Add more rows where necessary.
